

New Mexico Society of Hazardous Material Managers
NMSHMM Spring Field Trip
May 21, 2008

NMSHMM
NEW MEXICO SOCIETY
OF HAZARDOUS
MATERIALS MANAGERS

What: Join your fellow NMSHMMers, friends and co-workers and take a **FREE** tour of the *Albuquerque Bernalillo County Water Utility Authority's Arsenic Removal Demonstration Facility* at 8901 Desert Rain NW, Albuquerque.

When: Wednesday, May 21, 2008; 12:00-1:00 p.m., lunch to follow the tour

Description: The Arsenic Removal Facility is a state-of-the-art 5 MGD treatment facility built to remove naturally occurring arsenic from College Wells No. 1 and No. 2. This is the largest arsenic facility in New Mexico and utilizes a coagulation/ microfiltration process configuration.

Speaker: Kerrie Greenfelder, P.E.: Mrs. Greenfelder is a Project Engineer for CDM in their Albuquerque office. She has worked on numerous wastewater and water projects (including this Arsenic Facility) throughout New Mexico.

Lunch: Immediately following the tour in the park adjacent to the Arsenic Removal Facility. Bring your own or **order a box lunch*** (Ham & Swiss, Turkey & Provolone, Chicken Salad or Three Cheese) for \$12.00 with drink.

RSVP, *including choice of lunch*, by COB, May 19, 2008:
Brian Pence (pencebj@yahoo.com)

Driving Directions to the Arsenic Removal Facility (from I-40):

- Take I-40 West to Unser Boulevard. Exit on Unser and turn right (north).
- Follow Unser north to Tierra Pintada (second stoplight).
- Turn left onto Tierra Pintada.
- Take Tierra Pintada west to the end to West Creek.
- Turn right (north) onto West Creek.
- Turn right (east) onto Desert Rain.
- Site entrance is a dirt path on the left (north) side, right next to the community park.

Special Instructions: Close-toed shoes only please. No-shows will be billed for lunch, if ordered.
